BELT CONVEYORS

Vascon Engineering Equipments offers a quality range of Belt Conveyors. These consist of two or more pulleys that have a continuous loop of material that rotates above them. Size and length of a belt conveyor depends upon the weight of the material and the distance up to which it needs to be carried. The company designs and fabricates

varied dimensions of belt conveyors that are widely used in different sorts of industries. Apart from belt conveyors, the company also offers screw conveyors, material handling rollers, material handling idlers, material handling trolleys, bucket elevators and many other material handling products. Established in the year 1998, Vascon Engineering Equipments is counted amongst the premier firms engaged in manufacturing and supplying a qualitative range of industrial processing machines and equipment, with focus on continuous improvement in facilities and production standards and zero room for compromise. Successfully integrating advanced infrastructure facilities with technically adept human resources, the company has carved a niche for itself in the industry.

Embedded Low Power Radio Modules for Industrial Applications

*Actual size

Channel programmable transceiver
STD-302N-R 335 MHz

- Communication range 600 m (LOS)
- Data rate 4800 bps
- 1 mW, 3.0 V, 38 mA operation
- Other frequency versions available

DSSS transceiver **NEW !!**
STD-502-R 2.4 GHz

- Communication range 300 m (LOS)
- Data rate 9600 bps / 19200 bps
- 10 mW, 3.3 V, 65 mA operation

For industrial remote control & industrial measurement systems
